

RETURN TO PLAY PROTOCOL 2.0

COVID POINT OF CONTACT:

Moving forward with regards to all things COVID-19 and the current pandemic, we feel it is in the best interest of the club to have one specific individual overseeing these efforts. Our point of contact will be Mark Hansen our Director of Soccer Operations. His email is mhansen@floridakrazekrush.com.

GENERAL EXPECTATIONS:

1. Coaches
 - No pinnies will be utilized by coaches.
 - Maintain social distancing from players throughout the session/games as well as other staff.
 - Conduct temperature checks on players before every training session/game.
 - Ensure players do not congregate during water breaks/stoppages and space out equipment on sidelines.
 - Daily wash/sanitize any and all shared equipment.
2. Players
 - Players will be required to bring their own water and ball to all training sessions.
 - Players will be instructed to bring all game jerseys and asked to switch into a different jersey if necessary, for a training session in replacement of pinnies.
 - Instructed to lineup their gear with 6' spacing from other teammates around the edge of the field to ensure during water breaks that proper spacing is being adhered to.
 - Elimination of any and all handshakes post game between team/opponents/staff/referees.
3. Referees
 - Check their temperature before leaving for their first game.
 - When checking teams in, wearing a mask will be encouraged and socially distancing will occur.
 - Player cards will not exchange hands.
 - They will ensure both teams about to take part in the upcoming game have followed game day check-ins and symptom monitoring procedures.
4. Parents/Spectators
 - Check their child's temperature daily prior to leaving for training or games. If they have a temperature >100.4 keep them home that day.
 - Ensure all individuals in the household are healthy. If an individual is sick, take precautions and keep the child home until all are healthy.
 - Asked to not congregate on the sides of the fields or in parking lots
 - Maintain proper social distancing guidelines if they do not reside in the same household
 - If they cannot maintain socially distance then a mask is required or they will be asked to return to their cars.

GAME DAY CHANGES:

- All leagues and tournaments will be eliminating hydration stations at this time. All club events where in the past Gatorade/Water were provided to our membership will be eliminated. It is essential all families send their player with plenty of water and clearly labeled. Players SHOULD NOT be sharing any water/Gatorade.
- Sanitization Stations replacing hydration stations. At home events, we will be establishing stations where players will and should use hand sanitizer before getting on the field for the game and when they come off the field

immediately. We are asking all families still send their player with their own hand sanitizer. The club is also looking into other options

- Player cards will not exchange hands. The coach or the team manager will be responsible for handling and holding the cards throughout. At check-in, they will show the referee for confirmation with the game report.
- Game Day sidelines all referees, players, coaching staff, athletic trainers and other personnel present will be temperature checked prior to warm ups or first game of the day (For referees/coaches/personnel). Anyone who has a temperature >100.4 will be asked to isolate in the shade and drink fluids prior to having it checked a 2nd time after a period of 10 minutes has passed. If the temperature is still >100.4 that individual will be asked to go home and not participate that day.
- Game Day Report will be filed out prior to the game to ensure accuracy for players/referees/coaches/personnel in attendance and that all were checked in. This will be kept for tracking purposes.

SYMPTOM MONITORING:

- Routine temperature checks will be conducted before all FKK activities. Any player or staff member when presents with a temperature >100.4 will be sent home and instructed to see a health professional prior to returning to play.
- Online screening will also be conducted. It will be a quick questionnaire that needs to be completed prior to participating each day. It can be done on a computer or cell phone.

POSITIVE TEST PLAN OF ACTION:

- If any player or staff member should test positive for COVID-19 they should report that to the club COVID point of contact for contact tracing purposes.
- That player should immediately quarantine/isolate.
- Upon being informed of a positive test. The club will immediately notify that respective team of a positive test. Players personal information will not be given. The club will also notify any opposition that the team played against in the 48 hours prior to the positive test and also the referee assignor to notify the respective referees of any games.
- An analysis of the previous 48 hours activities held by the team will aide in determining if players had significant contact with the player to constitute an exposure.
 - The club is working with the coaching staff to design training sessions that will minimize exposure and help to prevent prolonged periods of time where players might not be able to maintain social distancing during training sessions.

WHAT CONSTITUTES EXPOSURE:

- Individual who has had close contact (less than 6 feet) for greater than/equal to 15 minutes with an individual who has tested positive.
- Any player who has had exposure to an individual who has tested positive should quarantine for 14 days from the last exposure and monitor symptoms throughout this time.
 - Check temperature 2x/day and check for other symptoms.
- Symptom free return to play- If that player who had an exposure does not develop any symptoms during the quarantine period they can return to soccer activities.

POSITIVE TEST – RETURN TO PLAY:

- If a player/staff member tests positive then for them to return to play they will have to be cleared based off one of two specific ways. These strategies are taken directly from Florida Dept of Health with regards to how they are clearing active cases.
- The two ways which they will be allowed to return to play are outlined below:
 1. Time-Based Strategy
 - a. Asymptomatic Positive – If the individual who tests positive never presents with symptoms, they are able to return to play after:
 - i. At least 10 days have passed since the date of their first positive test assuming they have not subsequently developed symptoms.
 - b. Symptomatic Positive- If the individual presents with symptoms, they are able to return to play after:
 - i. At least 3 days (72 hours) have passed **since recovery** defined as resolution of fever (without use of fever-reducing medication) and improvements in respiratory symptoms
 - ii. At least 10 days have passed *since symptoms first appeared*.
 - iii. **BOTH prongs must be achieved prior to returning**
 2. Test-Based Strategy
 - a. Negative results from at least two consecutive tests taken >24 hours apart.
- **Once they have been cleared they will have to contact the COVID Point of Contact (Mark Hansen) to complete a Return to Play Exit Questionnaire. They will not be allowed to return to the field until this has been completed.**

**As is with the state of this current pandemic and COVID-19 constant evolving situation, we will adhere to local/state/national CDC guidelines and all things above can be subject to change at a later date.*

By signing this waiver, you are agreeing that the club will be allowed to alert the team of any positive Covid test of your child. This would constitute a waiver of any HIPAA violation for advising the team of this medical information. The purpose of this additional waiver is that the teammates would need to be immediately aware of the positive test to allow that child and his/her family to take precautionary measures, including possible quarantine, testing, or other measures.
